DETAILED ACTION

Allowable Subject Matter

Claims 1-8, 11, 16-23 are allowed.

Regarding independent claims 1, 17 and 20, the closest prior art to the instant invention is Satran et al. (EP 0548752 A1). SATRAN ET AL teaches an indexable cutting insert comprising an anterior layer cutting head portion (i.e. top portion) comprising mutually inclined lateral faces (X: see figure below) of an anterior periphery and delimiting together with a large anterior face (12), a front view profile formed by a certain number of cutting edges (15a, 15b) mutually inclined in the direction (see arrow below and also figure 6) of said profile, and a posterior layer portion (i.e. bottom portion), constituting an anchoring base on a tool holder, comprising planar lateral faces (13) of a posterior periphery, at least some of which are framing supporting faces on walls of a seat of the tool holder (16), characterized in that the posterior periphery (13) comprises a smaller number of lateral framing supporting faces than the number of cutting edges (i.e. there are four posterior lateral faces (13) while there are eight cutting edges (15a & 15b for each side) ('752, figure 1).

However, Satran et al. fails to anticipate or make obvious the mutually inclined lateral faces (X) extending transversally to the anterior face. Satran et al. also fails to anticipate or make obvious the cutting edges being located substantially in a same plane.
